PROFILE

Data engineer with 3 years of experience building batch and streaming pipelines for finance clients.

EXPERIENCE

Data Engineer - Nordlake Analytics (09/2023 - present)

Built batch and streaming pipelines in Python and Apache Spark processing 2 TB of transactions per day.

Orchestrated 40+ daily jobs with Airflow and reduced pipeline failures by 30%.

Packaged every service with Docker and deployed them on Kubernetes (AKS).

Set up CI/CD with GitHub Actions for the data platform.

Data Engineering Intern - Banque Atlas (02/2023 - 08/2023)

Wrote SQL reporting queries on PostgreSQL for the risk team.

Built Power BI dashboards used by 50 analysts.

EDUCATION

Engineering degree in Data Science - Esprit School of Engineering (2023)
Preparatory classes in mathematics and physics (2018)

SKILLS

Python, SQL, Apache Spark, Airflow, Docker, Kubernetes, Microsoft Azure, Git, Power BI
