Data Engineer (junior to mid-level) - NovaTech Consulting, Tunis / hybrid

About the role
You will design and run the data pipelines of our clients in banking and retail.

Requirements
- At least 2 years of professional experience with Python.
- Strong SQL skills (PostgreSQL or equivalent).
- Experience with Apache Spark or another distributed processing framework.
- Hands-on experience with Docker.
- Engineering degree or Master's degree in computer science, data science or a related field.
- Professional English (written and spoken).

Nice to have
- Kubernetes.
- Workflow orchestration with Airflow.
- Experience with a cloud platform (Azure or AWS).
- CI/CD practices.
- French is a plus.
- Candidates aged 25 to 30 preferred.
